Giulio Dajani

Artificial Intelligence Student | Aspiring AI Entrepreneur
dajani.giulio@gmail.com | London, UK

PROFILE

Giulio is an ambitious and entrepreneurial AI and software engineering professional with a First-Class BEng (Hons) in Software Engineering (84%) from the University of Greenwich, now pursuing an MSc in Artificial Intelligence at King's College London. He built VerifAI, a multimodal AI-powered deepfake detection system achieving 99.5% balanced accuracy on the FakeAVCeleb dataset. Combining expertise in Python, machine learning, computer vision and web development with experience in technical support, product development and leading remote teams, Giulio brings a proactive, multilingual and international outlook to AI engineering, research and technology entrepreneurship.

EDUCATION

Artificial Intelligence | King's College London, UK — *2026–2027*
Projected Distinction. Coursework spanning deep learning, computer vision, and intelligent systems.

Communication and Media Studies | Dongguk University, South Korea — *2026*
A+ in Korean Language and Korean Popular Culture; Society & Media.

BEng (Hons) Software Engineering | University of Greenwich, UK — *2023–2026*
First Class Honours (84%). Courses include algorithms, AI, and systems design.

Computer Science Summer School | Yancheng Institute of Technology, China — *2025*
Cross-cultural academic exchange; participated in AI and software engineering workshops.

Computer Science | University of Turin, Italy — *2022–2023*
26/30 average.

Computer Science Diploma | ITIS Technical College, Turin, Italy — *2017–2022*
82/100 final grade.

RESEARCH & PROJECTS

AlbEval: Albanian Language AI | Independent Research Project (UK) — *2026–2027*
Building an Albanian-language benchmark to evaluate how well leading AI chatbots understand and generate Albanian, and fine-tuning a model to close the gaps for this underserved language.

Etsy & Gumroad Digital Business Venture | Independent Entrepreneur (UK) — *2026*
Developing and managing an independent digital business venture selling digital products through Etsy and Gumroad, with responsibility for product development, branding, market research, marketing, customer engagement, and commercial strategy.

VerifAI | Independent Entrepreneur (UK) — *2025–2026*
Multimodal deepfake detector combining Xception-based visual analysis with ResNet-18 audio analysis and calibrated late fusion, achieving 99.5% balanced accuracy and 0.996 ROC-AUC on FakeAVCeleb. It runs directly in the browser via ONNX/WebAssembly, with validated Python-equivalent preprocessing, cross-dataset evaluation, a FastAPI backend, open-source code, and archived model weights.

TheLostKeys | Indie Video Game (Remote) — *2025–2026*
Founder and CEO of a puzzle-adventure game project, leading a remote team of developers. Responsible for strategy, project management, and technical direction from concept to production.

AI Platform Development | Global Team (China) — *2025*
Collaborating with students and researchers from multiple universities to design an AI platform tailored to niche applications, focusing on practical innovation beyond large-scale systems like ChatGPT.

High School & University Projects | Personal & Academic — *2019–2024*
Designed small but impactful tech projects, showcasing continuous growth in problem-solving and programming since early studies.

EXPERIENCE

AI Automation Ambassador | Tech West England Advocates (TWEA), Remote — *2026–Present*
Building AI agents and automations to find funding opportunities, streamline bids and cut routine marketing and admin work.

Student Ambassador | King's College London — *2026–2027*
Lead campus tours and support open days and outreach events, helping prospective students and families learn about study and life at King's.

Technical Support Engineer | Fluent2 Limited, London, UK — *2025–2026*
Diagnose and resolve software/system issues for clients, ensuring quality service and technical reliability.

Front Desk & Events | Amano Group — *2024–2025*
Front desk and guest services at a busy London hotel in a fast-paced, international setting. Managed reservations and supported events alongside housekeeping and operations teams.

Freelance Translator | theEword (Remote) — *2024–2025*
Delivered professional translations with precision and cultural accuracy.

Programmer | Leonardo TEC SNC, Turin, IT — *2023*
Built and maintained custom web applications, applying multiple programming languages to meet client needs.

Hardware Technician | SAET S.R.L., Turin, IT — *2021*
Assembled and tested hardware components, ensuring system functionality and reliability.

CERTIFICATIONS & TECHNICAL SKILLS

Certifications: NDG Linux Essentials, Cisco Networking Academy Packet Tracer, ICDL (International Computer Driving License), Coventry University mentoring.
Programming Languages: C, C#, Python, JavaScript, Java, Scheme, Ruby, PHP, Bash, Rust, Go.
Web Development: HTML, CSS, JavaScript, React, NodeJS, ASP.NET.
Database Management: SQL.
Other Skills: Teamwork, communication, IT skills (M365).

LANGUAGES

- Italian: Native
- Albanian: Native
- English: Native
- Spanish: Basic
- French: Basic
- German: Basic

VOLUNTEERING & ACHIEVEMENTS

- Volunteered with the "Cenacolo Community," assisting individuals with personal challenges.
- Participated in the ERASMUS+ project with a German class.
